 (717) 395-6040

 Atlanta GA

PROFESSIONAL SUMMARY

Data Science undergraduate with academic preparation in artificial intelligence, deep learning, database management, algorithm design, and advanced mathematics. Proficient in Python, R, SQL, C, Bash, and Tableau, with project experience applying computational methods to medical imaging, traffic-sign recognition, and scheduling problems. Brings additional strengths in analytical review, process improvement, communication, teamwork, and leadership developed through internships, employment, and campus involvement.

KNOWLEDGE, SKILLS & ABILITIES

- Programming and Scripting: Python, R, SQL, C, and Bash
- Data Science and Analytics: data preparation, analytical problem-solving, data interpretation, and data visualization
- Machine Learning: AI fundamentals, deep learning architectures, classification techniques, and data-driven model development
- Computer Science Foundations: data structures, algorithms, database management, and computational reasoning
- Tools and Platforms: Tableau, GitHub, Microsoft Office Suite, and command-line environments
- Research and Quality Skills: documentation review, discrepancy identification, evidence evaluation, quality checking, and maintenance of organized, auditable records
- Professional Abilities: process improvement, stakeholder communication, teamwork, adaptability, customer service, leadership, and management of competing priorities

EDUCATION

WORK HISTORY

State Farm - Claims Leadership, Claims Specialist and Claims Associate Internships

Atlanta, GA • 05/2024 - 08/2026

- Reviewed claim records, policy information, and documentation to identify discrepancies and potential coverage concerns, facilitating accurate claims assessment.
- Conducted preliminary research and organized findings to expedite accurate, timely claim-handling decisions.
- Used enterprise systems to enter, maintain, and track claim information while preserving data accuracy, confidentiality, and auditability.
- Monitored workflow status, required tasks, deadlines, and documentation standards to identify delays and support timely case progression.
- Identified workflow bottlenecks and opportunities for process improvements, enhancing accuracy and turnaround time while improving customer experience.
- Communicated with customers, claim professionals, and internal partners to gather information, clarify findings, and coordinate next steps.

Puttshack - Bartender and Barback

Atlanta, GA • 08/2025 - Current

- Manage multiple time-sensitive requests in a high-volume environment while maintaining accuracy, organization, and service quality.
- Collaborate with bartenders and servers to anticipate needs, maintain inventory, and comply with health and safety standards.

Sons of Pitches FC - Coach

Atlanta, GA • 08/2025 - Current

- Plan and lead structured practices that build player skills through instruction, demonstration, drills, and feedback.
- Create an inclusive environment, communicate expectations clearly, and adjust activities based on participant needs.

Georgia State University
Atlanta, GA • Expected in 12/2026

Bachelor of Science: Data Science

- Relevant Coursework: Calculus III; Fundamentals of Data Science; Artificial Intelligence; Database Management; Design and Analysis of Algorithms
- GPA: 3.41

CERTIFICATIONS

- Google Professional Data Analytics Certificate | Google
- Learn Data Structures and Algorithms with Python | Codecademy
- Learn C | Codecademy

WEBSITES, PORTFOLIOS, PROFILES

- [linkedin.com/in/doronyospa](https://www.linkedin.com/in/doronyospa)
- github.com/DYospa

LEADERSHIP & CAMPUS INVOLVEMENT

- Pi Kappa Alpha Fraternity | Member, Community Service Chair, Speaker Communications Chair, and Scholarship Chair | January 2023-Present
- Actuarial and Risk Management Association | Member | January 2023-Present
- Inter-Fraternity Council | Scholarship Chair | August 2024-December 2024

PROJECTS

Deep Learning with Medical Imaging | January 2026-May 2026

- Applied deep-learning concepts within a medical-imaging problem domain.
- Demonstrated the ability to connect data science methods with a complex, real-world application.

Project repository: github.com/DYospa/Deep-Learning-with-Medical-Imaging

Job Scheduling Assistant | February 2026-April 2026

- Developed a computational project focused on the organization and scheduling of jobs.
- Applied programming, algorithmic reasoning, and structured problem-solving.

Project repository: github.com/DYospa/Job-Scheduling-Assistant

Traffic Sign Recognition Using Deep Learning | March 2026-April 2026

- Contributed to a team project applying deep-learning methods to traffic-sign recognition.
- Built experience working collaboratively on a classification-oriented data science problem.

Project repository: github.com/Mdiallo00/Traffic-Signs-Recognition

HONORS & SCHOLARSHIPS

Paul Groves Blount Scholarship | Pi Kappa Alpha, Epsilon Nu | September 2025, Risk Management and Insurance Scholarship | Georgia State University, J. Mack Robinson College of Business | April 2024, C.V. Starr Scholarship | Georgia State University, J. Mack Robinson College of Business | August 2023
